PART A.

1. Executive Summary

Purpose

The Bayside Public Toilet Strategy summarises Council's approach to providing and managing public toilet facilities and includes 68 public toilets (including 2 Changing Places).

Council's role

There is no legislative requirement for Council to provide public toilets, however they are a service that is much valued by the community in supporting the use of Bayside's parks and reserves, facilities, and activity centres.

Council's role is to plan and deliver new facilities to support demand, maintain and clean existing public toilets, and replace aging or ineffective facilities. Council must provide this service in a way that is financially sustainable.

Key issues and findings

A number of key issues were identified in the development of this Strategy:

- **Equality and Inclusion** – it is recommended that Council continue to replace older public toilets assets with modern, accessible, and inclusive facilities.
- **Changing Places** - Changing Places are an important asset and allow people with high support needs and their carers to plan and enjoy various activities throughout Bayside. A key part of the Strategy is the development of criteria to prioritise the location of new facilities.

Our Vision

Council's vision is for public toilet facilities to be accessible, inclusive, and safe for all users.

- **Accessible** means that facilities can be used by anyone regardless of ability;
- **Inclusive** means facilities that do not discriminate based upon background, experience, or identity.
- **Safe** means appropriately designed and constructed facilities which are well-maintained and regularly cleaned.

Goals and strategic objectives

The following goals and objectives were identified:

- Our community values accessible infrastructure which supports a range of abilities

- Our community values infrastructure which is safe and inclusive for all users
- Our community can expect a quick response when a facility is damaged, vandalised or requires cleaning
- Our community can expect that public toilets are in good condition and function correctly

Capital Works Program

The renewal of the following existing public toilet facilities is recommended:

- Brighton Beach Southern Terrace toilet
- Balcombe Road carpark toilet
- Beaumaris Concourse toilet
- Ricketts Point Bluestone toilet

Community Engagement

The Public Toilet Strategy will be open for community engagement prior to adoption.

PART B.

2. Purpose

The Bayside Public Toilet Strategy 2024-2028 summarises Bayside City Council's approach towards the management of public toilets. As of 2023, there are presently 68 public toilet facilities in Bayside including two Changing Place facilities for people with higher support requirements. A complete list and map of Bayside's public toilet facilities is shown in Appendices A and B.

A key component of the Strategy is the recommended capital works program which shall guide major improvements to public toilets (including Changing places) in Bayside over the next four years.

The previous iteration of the Strategy (Bayside Public Toilet Strategy 2019-2023) delivered the following capital works program:

- a new ambulant and accessible facility at Green Point, Brighton.
- an expanded facility (including accessible and Changing Place cubicles) in Well Street, Brighton.
- a replacement facility (including ambulant, accessible, and Changing Place cubicles) at Thomas Street Reserve, Hampton.
- Minor upgrades to several facilities.

3. Glossary

Term	Definition
Public Toilet	A toilet facility that provides amenity services to the general public.
External Facing	An 'external facing' facility includes standalone facilities or those which are part of a major building but with independent access. External facing facilities are the primary focus of this Strategy.
Internal Facing	An 'internal facing' facility is part of a larger building and is intended for the use of its occupants. Internal facing facilities are <u>not</u> within the scope of this strategy.
Non-accessible	A cubicle that does not meet minimum accessibility standards.
Ambulant	A cubicle designed for those with ambulant disabilities that do not require the extra space to use a wheelchair.
Accessible	A cubicle with additional space, lowered sinks, and additional grab bars designed for people who require the use of a wheelchair.
Changing Places	A facility designed for users and their carers with high support requirements and includes a change table, hoist, shower, and greater internal space. Changing Places are 'external facing' and always available to carers provided they have the appropriate key.
Accessible Adult Change Facility	An Accessible Adult Change facility is similar to a Changing Place but is 'internal facing'. They support the use of a single facility and are only available to users of that facility when it is open.
CPTED	Crime Prevention Through Environmental Design (CPTED) is the design of buildings or public spaces to reduce the likelihood of antisocial activity. This may include minimising opportunities for concealment or improving passive surveillance.

4. Legislative and policy and context

There is no legislative requirement for Council to provide standalone public toilets (except as part of major facilities), however they are a service that is much valued by the community that enhances enjoyment of Bayside's community facilities, open space and recreational reserves, and commercial precincts.

Disability Discrimination Act 1992

The *Disability Discrimination Act 1992* (DDA) legislates for the protection of all Australians from discrimination based on a disability and remove barriers to participation. The DDA is highly relevant when providing public infrastructure such as toilets and ensuring that they are accessible and operable for all users.

Gender Equality Act 2020

The *Gender Equality Act 2020* requires that gender impact assessments are to be undertaken to ensure all people have equal access to community infrastructure and services. At Bayside, these are expanded into Equity Impact Assessments (EIAs) which consider a broader range of impacted groups.

The following Council documents are also relevant to the provision of public toilets throughout Bayside:

- Asset Plan 2023-2032
- Sustainable Building and Infrastructure Asset Policy
- Service Driven Asset Management Policy
- Disability Action Plan 2021-2025
- Municipal Public Health and Wellbeing Plan 2021–25
- Active by the Bay Recreation Strategy 2013-22
- Bayside Open Space Strategy
- Bayside Sportsground Pavilion Improvement Plan

5. Vision statement

Council's vision is for public toilet facilities to be accessible, inclusive, and safe for all users.

- Accessible means that facilities can be used by anyone regardless of ability;
- Inclusive means facilities that do not discriminate based upon background, experience, or identity.
- Safe means appropriately designed, located and constructed facilities which are safe to use, well-maintained and regularly cleaned.

This vision was developed with consideration of Bayside's 2050 Community Vision and related Council documentation.

6. Council's Strategic Planning Framework

The Bayside 2050 Community Vision was developed by a representative community panel of local residents and sets out a guiding framework of what the community thinks Council should be working towards. This document developed 10 long-term 'themes' to guide Council on delivering services which are valued by the Bayside community.

The Public Toilet Strategy is a **strategic service plan** and seeks to deliver a service which is consistent with the Community Vision.

The most relevant themes which the Strategy delivers on are:

- **Theme 3: Transport, Walkability and Rideability** – public toilets support active modes of transport and often provide useful infrastructure such as drinking fountains, baby change facilities, and in some cases bicycle repair stations.
- **Theme 4: Community Feel and Direction** – public toilets support the use of open space, recreation, and commercial precincts throughout Bayside by allowing people to plan activities and spend longer in these spaces.
- **Theme 8: Access and Inclusion** – Council strives to deliver public toilet facilities which are available for all users regardless of background, experience, or identity.
- **Theme 9: Built Environment** – Council seeks to deliver public toilets which are safe, accessible, inclusive, and well-maintained with minimal impact to the natural environment.
- **Theme 10: Tourism, Commercial and Economic Opportunities** – Public toilets support enjoyment of Bayside's open space, recreation, and commercial precincts and result in increased economic benefit.

The Strategy shall also directly contribute to **Objective 3.2** of the Council Plan 2021-2025 in providing safe, accessible and inclusive infrastructure for the whole community.

7. Scope

The Bayside Public Toilet Strategy will summarise how Council manages Bayside's 68 public toilet facilities (including two Changing Places).

The Strategy will consider Council-managed 'external facing' facilities only. This includes standalone facilities but also public toilets that are on the outside of a larger Council building and can be accessed when that building is closed. 'Internal facing' toilets which can only be accessed from inside a building are not within the scope of this Strategy.

In some cases, other Council programs will result in the construction or upgrade of new public toilets, and these facilities have been removed from consideration under the Strategy.

8. Methodology

The development of the Public Toilet Strategy followed the following key steps:

Research

One of the earliest stages of development of this Strategy was an Equity Impact Assessment (EIA) where officers were asked to consider and assess the potential for impacted groups in the community to be affected by this proposal. The impacted groups considered included gender, disability, age, race, culture, religion, literacy, neurodiversity, socioeconomic,

homelessness, and social isolation. While Council's intention is to provide facilities which are inclusive of the whole community, considering and hearing (via community engagement) from impacted groups can further improve the service outcome.

Analysis

Council has carried out an audit of all existing public toilets across Bayside to assess each facility's condition, capacity, and function. Historic inspection, maintenance, and cleaning data was also reviewed to indicate which toilets were most prone to breakdown or overuse.

The condition of individual facilities is frequently a driver for replacement. Council can often continue to maintain a facility or carry out replacement of internal fittings or even structural elements such as the roof. However, at some stage the cost of maintaining the facility may become unreasonable and replacement should be considered. It is important to note that cleanliness and graffiti do not determine a structure's overall condition.

Of particular interest in this assessment was how well each toilet performed in accordance with accessibility standards and requirements. This data was analysed to determine which toilets offer an appropriate level of access and identified facilities which would benefit from improvement.

Criteria

It is acknowledged that there may be a perceived need for a toilet in many locations throughout Bayside, however the cost of implementing and managing such a network would be excessive.

The following criteria have been proposed to help Council identify and prioritise the need for new facilities. Public toilet facilities which are prioritised under this Strategy should reasonably satisfy the following criteria:

- The new location supports a Council facility, open space or recreational reserve, or activity centre.
- There is available Council land for a new public toilet, and it can be appropriately located from a safety (CPTED) perspective.
- There is no other public toilet within 400m.
- The facility can be reasonably constructed and maintained by Council's contractors.
- Changing Places are rationalised to support a range of activities (e.g. playgrounds, recreation, foreshore, commercial activity) and there is no other Changing Place within 2km.

New toilets may also be proposed under other **Strategic Service Plans** which may have different criteria to support their services. Some of these criteria include:

- Under the Bayside Open Space Strategy, public toilets should be provided in all 'municipal/regional' open space reserves.
- Under the Bayside Playground Improvement Plan, public toilets should be provided in all 'municipal/regional' playgrounds.
- Under the Bayside Sportsground Pavilion Improvement Plan, amenities are recommended to support the community space around sports facilities (i.e. spectators).

Community Engagement

To understand the lived experience of community members with accessibility needs, Bayside's Disability Access and Inclusion Advisory Committee (DAIAC) was engaged throughout the development of the Strategy, with a focus on the provision of Changing Places facilities.

A comprehensive community engagement program will be undertaken to refine the draft Strategy between February and March 2024. This has been timed to coincide with the summer period when public toilets are in high use, particularly along the foreshore.

A range of engagement methods will be used to gather feedback including an online survey, interactive social map and meetings with representative committees.

Participation will be incentivised through a competition to win a year's supply of toilet paper.

9. Key issues and findings

Accessibility

Many of Bayside's public toilet facilities have been constructed since the introduction of the *Disability Discrimination Act 1992* and have some level of accessible facility either through construction or retrofit.

Bayside has an aging demographic and many people may experience mobility or strength issues related only to healthy aging. Improving the accessibility of public toilets makes them safer and easier to operate for users and is of significant benefit to the whole community.

Recommendation: Older public toilets shall be gradually replaced or upgraded to meet or exceed modern accessibility compliance.

Gender

During review of the Bayside Sportsground Pavilion Improvement Plan, Council resolved that toilet facilities in sporting pavilions were to be gender neutral to support an increase in female participation in sport.

This principle has been extended to previous Public Toilet Strategies with only gender-neutral facilities being constructed in recent years. This removes limitations to full utilisation so that users may occupy any vacant cubicle.

Gender neutral facilities allows for public toilets to be safely and comfortably used by:

- A child who is escorted by their parent, guardian, or carer of the opposite sex.
- A person with a disability who require the assistance of a carer of the opposite sex.
- Gender diverse people.

Gender-neutral facilities also allow for the full capacity of a toilet block to be available to all users.

Recommendation: Gender-specific facilities shall continue to be replaced with gender neutral facilities as in previous years. Facility signage should also be reviewed to further encourage usage by all members of the community.

Changing Places

Changing Places are an important asset and allow people with high support needs and their carers to plan and enjoy various activities throughout Bayside.

Council presently has two active Changing Places at Thomas Street Reserve and Well Street carpark with three more proposed or under consideration:

- Yalukit Willam Nature Reserve
- Beaumaris Arts Group
- Dendy Park Athletics Pavilion

Changing Places are access controlled and as such do not duplicate the function of an accessible public toilet, requiring both facilities to be provided. Constructing ambulant, accessible and Changing Places in one location increases both the footprint and cost of a new public toilet facility.

Improved cost efficiency can be found by considering new facilities as part of larger public toilet facilities or major buildings. Larger buildings will often provide additional benefits such as car parking which is essential for Changing Places to be effective.

Recommendation: Changing Places or Accessible Adult Change facilities should be considered in all new major Council buildings, subject to the Strategy criteria in Part 7: Methodology.

Network Gap

Public toilets provide a supporting role to various Council services. While public toilets would be valuable in many locations, it is important for Council to not exceed available budget and resources to manage its facilities.

Council has proposed a number of criteria to prioritise facilities which support council services, active and passive recreation, and commercial activity.

Recommendation: New toilets proposals shall be considered based upon the Strategy criteria in Part 7: Methodology.

Automated Facilities

Automated facilities are often pre-constructed for ease of installation, have a small footprint, and features such as an automated door. Some of these facilities have increased operating costs, and no longer meet modern compliance standards.

Recommendation: Council will look to replace older automated facilities with automated or non-automated modern and non-proprietary facilities. Automated facilities will be considered primarily where existing electrical connections are established.

Utilisation

While most Council facilities are staffed by officers or a tenant, public toilets are not currently monitored for usage. This can make it difficult for Council to determine which facilities are undersized or may not be required.

Council has previously investigated the implementation of data counters. Such counters can be implemented to determine the number of times a threshold is crossed, a door is opened, or a toilet is flushed and give officers accurate data around where capital works should be prioritised.

Data counters do not include any form of camera or microphone recorder and are capable only of counting.

Recommendation: Council shall undertake a pilot of data counters with a plan to expand their usage throughout the public toilet network.

Maintenance Challenges

Public toilets can be a difficult building asset to maintain and kept clean. They are unstaffed, exposed to weather, and frequent targets of vandalism and misuse.

Recommendation: Council shall seek to improve the balance of comfortable yet hardened facilities. Building materials and components should be easy to source (i.e. locally), user-friendly, and resistant to wear, vandalism, and graffiti.

Community Engagement findings

[This section shall be populated following community engagement]

10. Goals, strategic objectives, and action plan

The Bayside Public Toilet Strategy shall encompass two strategic objectives which relate to the themes of the Bayside 2050 Community Vision and Council Plan 2021-2025.

Goal 1: Our community values equity and inclusivity

Strategic objective 1: Our community values accessible infrastructure which supports a range of abilities		
Actions	Timeframe	Strategic Indicators
Improve public toilet asset service level standards. Ensure that new public toilets meet a high standard of accessibility, beyond minimum compliance levels.	2025	<ul style="list-style-type: none"> Develop a design guide to ensure that new facilities meet minimum and/or desired standards Increased number of accessible public toilet facilities
Carry out minor capital works and maintenance which improves the accessibility of a facility towards or beyond compliance	Ongoing	
Replace older facilities with modern facilities which meet and exceed modern accessibility standards.	2025-2028	

Strategic objective 2: Our community values infrastructure which is safe and inclusive for all users		
Actions	Timeframe	Strategic Indicators
Replace older facilities with modern facilities which are available to all users	2025-2028	<ul style="list-style-type: none"> Increased number of gender-neutral public toilet facilities
Review and adopt gender-neutral signage for public toilet facilities	2025	
Gradually implement gender-neutral signage as replacement is needed	Ongoing	

Goal 2: Our community values safe, clean, and fit-for-purpose infrastructure

Strategic objective 1: Our community can expect a quick response when a facility is damaged, vandalised or requires cleaning

Actions	Timeframe	Strategic Indicators
Adopt and implement non-invasive data counters to improve proactive cleaning schedule.		<ul style="list-style-type: none"> Improved response times for maintenance, cleaning, and vandalism requests Improved strategic planning for public toilets in Bayside
Investigate development of an improved toilet identification sign which includes both a phone number and a QR code to report faults, vandalism or mess.	2024/25	

Strategic objective 2: Our community can expect that public toilets are in good condition and function correctly

Actions	Timeframe	Strategic Indicators
Additional funding to renew and upgrade toilet components and improve accessibility	Annual	<ul style="list-style-type: none"> Increase the overall condition profile of Bayside's public toilets
Facilities in poor condition are gradually replaced with new inclusive, safe, and accessible public toilets	Ongoing	

11. Implementation and reporting

The Bayside Public Toilet Strategy shall be delivered through a combination of operational and capital programs (See Part 13: Program of Capital Works).

Inspection, maintenance, and cleaning of public toilets shall continue to be managed through Council's facility maintenance and cleaning contracts. Minor capital works will be managed by Council's Facilities Maintenance team while major new, upgrade or renewal works will be managed by the Project Services team. Council's Assets team shall be responsible for overseeing implementation of the Strategy and reporting.

12. Financial resources

Cleaning and maintenance of public toilets will be resourced within Council's existing operational budget and delivered through Council's facility maintenance and cleaning contracts.

New, upgraded, and renewal of public toilets shall be funded from Council's capital works program. The Public Toilet Strategy shall outline the funding requirements and capital works program for 2024-2028. This budget may be supplemented with State Government grants for new Changing Places where possible.

13. Program of capital works

To deliver the strategic objectives outlined in this Strategy, the following program of capital works program is proposed.

Priority (or timeframe)	Capital project	Estimated costs
2024/25	Renewal of Brighton Beach Southern Terrace public toilet (TOI31) The existing toilet block will be replaced with a new facility in the same location, including 6-8 standard, ambulant, and accessible cubicles. A new outdoor shower and drinking fountain shall also be provided.	\$700,000
2025/26	Renewal of Balcombe Road carpark public toilet (TOI12) The existing toilet block will be replaced with a new facility in the same location, including a mix of ambulant and accessible cubicles.	\$350,000
2026/27	Renewal of Beaumaris Concourse public toilet (TOI09) The existing toilet block will be replaced with a new facility in the same location, including an ambulant and accessible cubicle.	\$450,000
2027/28	Replacement of Ricketts Point Bluestone Foreshore toilet (TOI36) The existing toilet block will be replaced with a new facility in the same location, including a mix of standard, ambulant, and accessible cubicles.	\$450,000
2025-2028	Public Toilets – Minor Works and Accessibility Improvement – additional budget provided to Council’s public toilet minor works program for improving accessibility	\$75,000 per year

*subject to budget approval

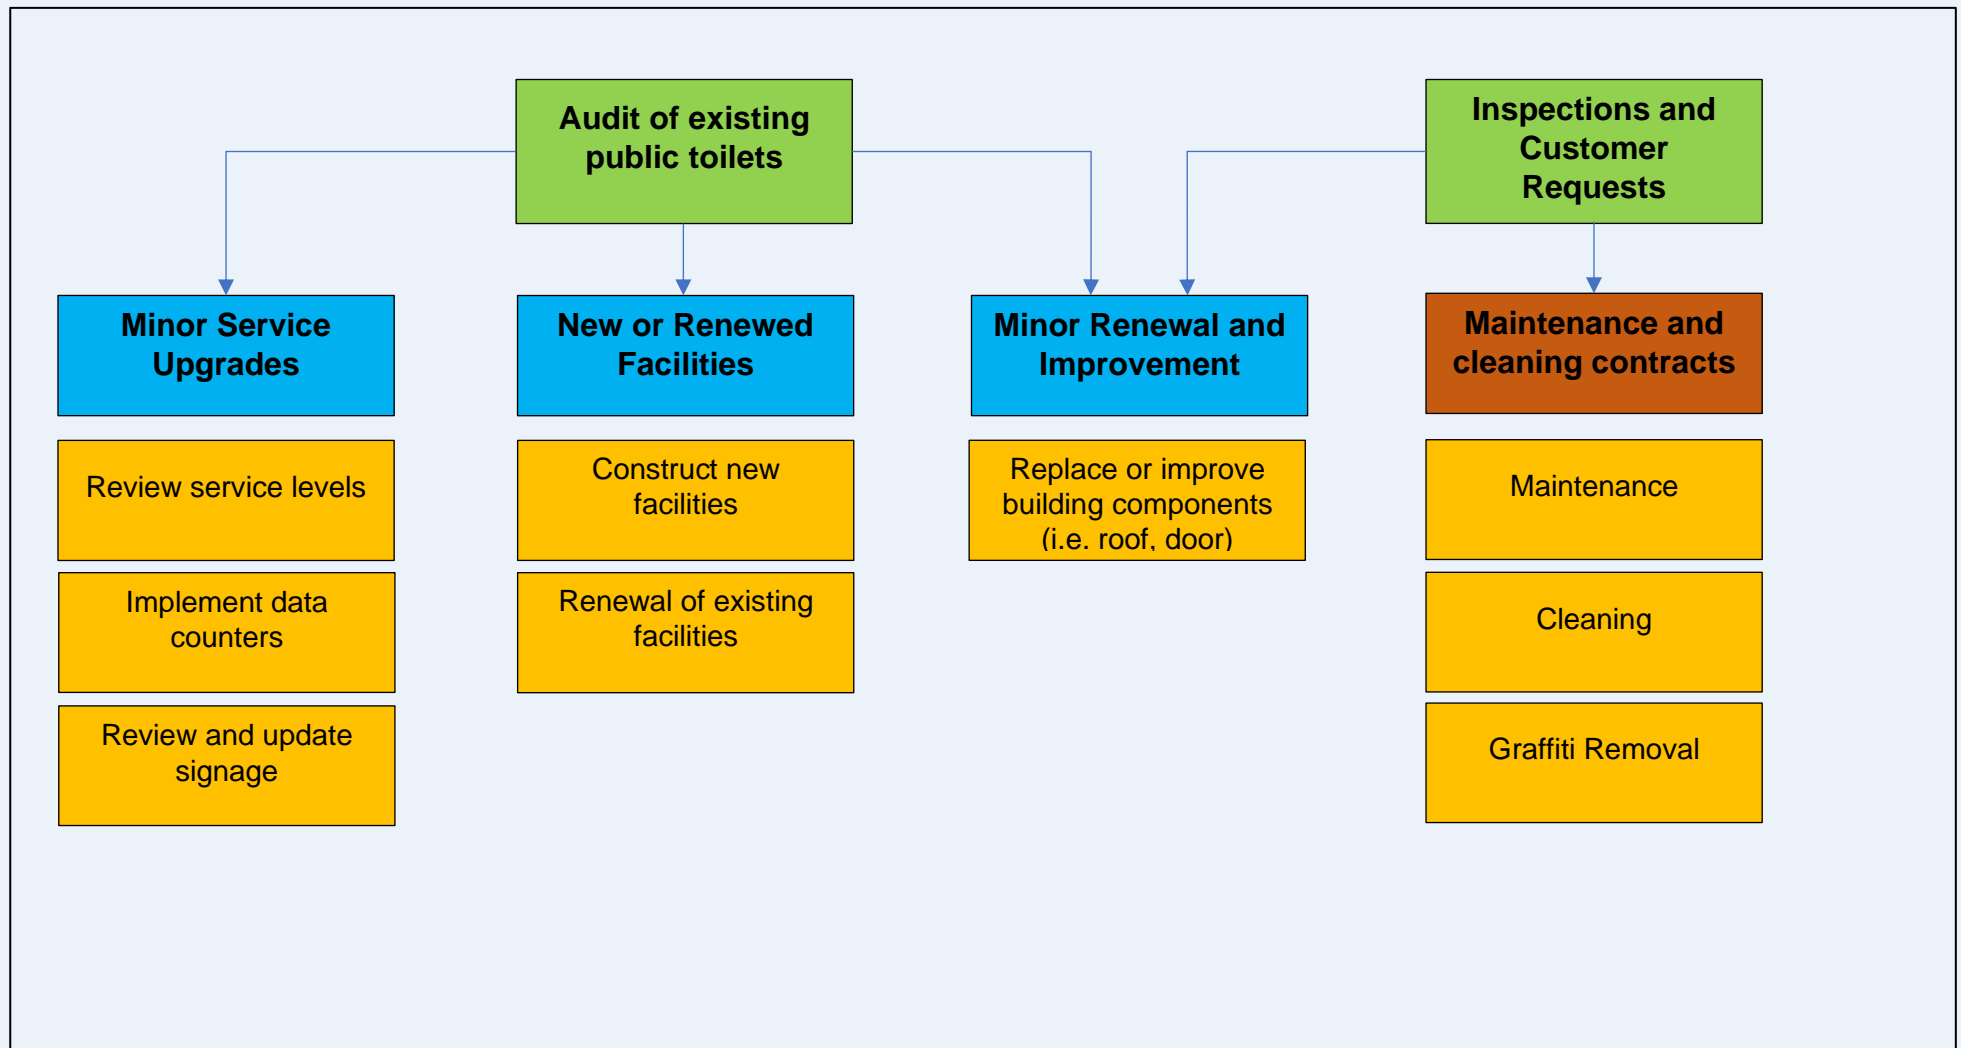

Figure 1 Public Toilet operational, renewal, and upgrade programs

14. Appendix A – List of Council-managed facilities

Below is a list of all public toilet facilities managed by Council and may be read in conjunction with the map in Appendix B. As several Council programs may deliver new toilets, some of these facilities have been excluded from consideration under this Strategy. The 'TOI' toilet number is provided on most toilets to make it easier to report maintenance and cleaning issues.

Facilities below shaded in **green** have recently been constructed, **red** are being replaced under a different program, and **blue** are being replaced under this Strategy.

Toilet Number	Facility Name	Status
TOI01	Elsternwick Park Pavilion 2 Public Toilet	Recently constructed
TOI02	Balcombe Park Public Toilet	
TOI03	Banksia Reserve Pavilion Public Toilet	
TOI04	Basterfield Park Public Toilet	
TOI05	Marion Street Carpark Public Toilet	
TOI06	Trevor Barker Beach Oval Public Toilet	
TOI07	Middle Brighton Baths Public Toilet	
TOI08	Beaumaris Sports Reserve Pavilion Public Toilet	Recently constructed
TOI09	Beaumaris Concourse Public Toilet	Proposed for renewal under Public Toilet Strategy 2023-2028
TOI10	Billilla House Historic Public Toilet	
TOI11	Black Rock Gardens Public Toilet	
TOI12	Balcombe Road Carpark Automated Public Toilet	Proposed for renewal under Public Toilet Strategy 2023-2028
TOI13	Half Moon Bay Life Saving Club Public Toilet	Planned reconstruction under the Half Moon Bay Masterplan
TOI14	Brighton Beach Reserve Public Toilet	Planned reconstruction under the Sportsground Pavilion Improvement Plan
TOI16	Castlefield Reserve Pavilion Public Toilet	
TOI17	Cheltenham Park Pavilion Public Toilet	
TOI18	Cheltenham Recreation Reserve Public Toilet	
TOI19	Jetty Road Kiosk Public Toilet	
TOI20	Dendy Park Pavilion Public Toilet	
TOI21	Dendy Park Athletics & Soccer Pavilion Public Toilet	Planned reconstruction under the Sportsground Pavilion Improvement Plan
TOI22	Elsternwick Park South Public Toilet	
TOI23	Elsternwick Park Pavilion 1 Public Toilet	
TOI24	Green Point Foreshore Public Toilet	
TOI25	Hampton Life Saving Club Automated Public Toilet	
TOI26	Highett Grove Public Toilet	Planned reconstruction as developer contribution
TOI27	Sandringham Foreshore Public Toilet	
TOI28	Hurlingham Park Pavilion Public Toilet	
TOI29	Jetty Road Foreshore Public Toilet	
TOI30	Keys Street Public Toilet	
TOI31	Brighton Beach Public Toilet	Proposed for renewal under Public Toilet Strategy 2023-2028
TOI32	Southern Basketball Association Public Toilet	
TOI33	Landcox Park Public Toilet	
TOI34	Donald MacDonald Reserve Pavilion Public Toilet	Recently constructed
TOI35	Beaumaris Foreshore Public Toilet	

TOI36	Ricketts Point Bluestone Public Toilet	Proposed for renewal under Public Toilet Strategy 2023-2028
TOI37	Ricketts Point Foreshore Automated Public Toilet	
TOI38	Royal Avenue Parklands Public Toilet	Recently constructed
TOI39	Sandringham Athletics Pavilion Public Toilet	
TOI40	Destructor Reserve Pavilion Public Toilet	Recently constructed
TOI41	Tulip Street Baseball Pavilion Public Toilet	Planned reconstruction under the Sportsground Pavilion Improvement Plan
TOI42	Trevor Barker Beach Oval Toilets & Shelter	
TOI43	Sandringham Station Automated Public Toilet	
TOI44	Shipston Reserve Pavilion Public Toilet	
TOI45	Sillitoe Reserve Pavilion Public Toilet	Recently constructed
TOI46	Simpson Reserve Pavilion Toilet	
TOI47	Southey Street Foreshore Public Toilet	Recently constructed
TOI48	Table Rock Foreshore Public Toilet	
TOI49	Dendy Park Public Toilet (Dacey Street)	
TOI50	Thomas Street Reserve Public Toilet and Changing Place	Recently constructed
TOI51	Thomas Street Carpark Automated Public Toilet	Planned reconstruction under the Public Toilet Strategy 2019-2023
TOI52	Dendy Park Public Toilet (playground)	
TOI53	Well Street Public Toilet and Changing Place	Recently constructed
TOI54	Whyte Street Public Toilet	
TOI55	William Street Reserve Pavilion Public Toilet	Recently constructed
TOI56	Willis Lane Carpark Public Toilet	
TOI57	Spink Street Public Toilet	
TOI58	Seaview Carpark Automated Public Toilet	
TOI59	Peterson Reserve Pavilion Toilet	Planned reconstruction under the Sportsground Pavilion Improvement Plan
TOI60	North Road Foreshore Public Toilet	
TOI61	Dendy Village Automated Public Toilet	
TOI62	Sandringham Gardens Automated Public Toilet	
TOI63	Chisholm Reserve Pavilion Public Toilet	
TOI64	Kamesburgh Public Toilet	
TOI65	Jack Levy Pavilion Public Toilet	Planned reconstruction under the Sportsground Pavilion Improvement Plan
TOI66	A W Oliver Pavilion Public Toilet	
TOI67	Green Point Parkland Toilet	Recently constructed
TOI68	Black Rock Life Saving Club Public Toilet	Planned reconstruction
-	Yalukit Willam Nature Reserve	Yalukit Willam Nature Reserve Masterplan
-	Elsternwick South (playground) Public Toilet	Open Space Strategy
-	Beaumaris Arts Group Changing Place	Council Plan

15.Appendix B – Map of Council public toilet facilities

This is a map of Bayside showing all of the public toilet facilities listed in Appendix A. The buffer around the facilities is a 400m radius for public toilets and 2km for Changing Places.

Legend

- Bayside Public Toilet Facility
- Existing public toilets (400m buffer)
- Existing Bayside Changing Places (2000m buffer)
- Proposed Bayside Changing Place (2000m buffer)
- Existing non-Bayside Changing Places (2000m buffer)
- Municipality_Boundary

Bayside Public Toilet Network

16.Appendix C – Condition Assessment of Public Toilets

Below are the results of Council’s condition assessment of Bayside’s public toilets in 2023. Toilets were also assessed based upon a number of other criteria including capacity and accessibility. See Appendix 1 for facility names.
